PRIME PROGRAM ELIGIBLE

PROFESSIONAL SUMMARY

Product-minded Full-Stack Developer specializing in bridging robust web architecture with intelligent systems. Proficient in crafting clean, type-safe frontends in React and TypeScript while architecting high-performance backend APIs with Python (FastAPI/Django). Experienced in orchestrating autonomous AI agentic workflows and building smart, user-centered applications that solve real-world operational problems.

TECHNICAL SKILLS

Front-End TypeScript, JavaScript, HTML5, CSS3, React, Svelte, Tailwind CSS

Back-End & APIs Python, FastAPI, Django, Flask, Node.js, Prisma, MariaDB

AI & Automation Agentic Workflows, LLM Orchestration, Gemini CLI/APIs, Tool-Use Integration

Tools & DevOps Bun, UV, Git/GitHub, Figma, Docker, CI/CD pipelines

Languages Spanish (Native), French (B2 - Professional), English (CELB 10 - Fluent)

PROFESSIONAL EXPERIENCE

Full-Stack Web Developer (Internship) — L'Original

Feb 2026 – Apr 2026 | Montréal, QC

- Developed custom Node.js scripts to optimize digital asset storage, successfully detecting and removing duplicate media library images to reduce system overhead.
- Enhanced UI/UX zoom interactions within high-performance artwork galleries to refine responsive browser rendering and presentation.
- Engineered secure, end-to-end artist registration features, integrating React UI validation with Prisma ORM and MariaDB persistence.
- Architected automated image optimization pipelines utilizing Next.js and Node.js to drastically decrease page load times across the platform.

Assistant Residential Manager — Realstar Management

Jun 2022 – May 2023 | Kelowna, BC

- Coordinated daily operational logistics and facility workflows for residential properties, supervising multi-disciplinary teams to guarantee strict quality standards.
- Acted as the core point of contact for complex tenant inquiries and conflict resolution, managing cross-functional maintenance schedules under tight constraints.
- Streamlined unit inspection and turnover systems, optimizing resource allocation and executing critical operational repairs to protect asset retention.

EDUCATION & CERTIFICATIONS

Website Design Specialist Diploma — Vanier College

Graduated April 2026 | Montréal, QC

Core focus on advanced web design pipelines, multimedia digital systems, and full-stack software development frameworks.

Professional Technical Certifications

2025–2026

- AI & Software Engineering:** AI Fundamentals (Google) • Claude Code in Action (Anthropic) • Introduction to Software Engineering (IBM)
- Cloud & DevOps Infrastructure:** Introduction to DevOps (IBM) • Introduction to Cloud Computing (IBM)
- Design Strategy & UX:** User Experience (UX) • Design Thinking (Interaction Design Foundation - IxDF)
